	Total	**8514**	**9902**	

PgMP counts were collected from PMI's public Certification Registry. The October 2026 snapshot contains 9,902 publicly listed entries across 118 countries and territories with at least one entry. Registry visibility is optional, so these counts should not be treated as PMI's definitive worldwide certification totals. Under PMI's Continuing Certification Requirements rules, holders who do not complete renewal requirements may enter a 12-month suspension period during which they cannot use the certification designation. Changes between September 2025 and October 2026 represent net changes in publicly listed counts, rather than the number of newly awarded certifications. They may reflect new certifications, changes in certification status, public visibility or recorded country. The comparison covers approximately 13 months; percentage changes are not annualised
